

### How To Make Your 3D Shark Card

1. First, print out your shark printable on a fun color or use white paper.
2. Fold your shark paper in half on the dotted line.
3. Cut on the solid line to make the shark's mouth.
4. Cut out the teeth and glue them inside the mouth.
5. Add glue around the back edge of your shark paper.  
Stick a bright piece of Astrobrights® cardstock behind it.
6. Gently push the mouth pieces open while you fold the paper in half again. Watch your shark chomp!
7. Decorate your ocean scene with waves, fish, sea creatures, bubbles, and anything else you can imagine!
